APPENDIX N
Point of Entry Reverse Osmosis System
STANDARD EQUIPMENT

- Thin Film Composite Membranes
- Stainless Steel Pressure Vessels
- Rotary Vane Brass Pump
- Motor
- 5 Micron Pre-Filter (1)
- 10 Micron Carbon Filters (2)
- Polypropylene Filter Housings (3)
- Automatic inlet feed solenoid valve
- Heavy duty powder coated frame
- Liquid Filled System Pressure Gauges
- Low Pressure Switch
- System control valve
- Recycle control valve
- Polyethylene High Pressure Tubing
- Product Tank Pressure Control (Required to turn system on/off with pressurized tank - tank sold separately)

OPTIONAL EQUIPMENT

- * Pressurized Product Water Storage Tank 40 or 88 Gallon Size
- Stainless Steel Pump
- *Pre-treatment equipment:
  - Softener
  - Carbon filter
  - Multi-media filter

*Recommended Minimum Options

</table>

*Elements are 2.5" (6.4 cm) Diameter

NOTES

- All dimensions and weights are approximate.
- System must operate with a pressurized storage tank to turn system on/off (quoted separately).
- Systems rated at 77°F (25°C) using 1000 ppm sodium chloride solution and 200 psi pressure.
- System capacity changes significantly with water temperature. For higher TDS, a water analysis must be supplied and could result in modifications to the system.
- Chlorine must be removed prior to RO system if present in the feed water.
- Water must be pretreated by a softener or antiscalant to avoid scaling the membranes.
- Standard packaging is boxed, crating optional.

ORDERING INFORMATION

Please add our voltage codes to the end of the model number when ordering.
Example: AA-12521-116 = 110v / 1 ph / 60 hz.

Voltage: 116 = 110v/ 1ph/ 60hz
Codes: 215 = 220/230v, 1ph, 50hz

Three Phase Not Available
Applied Membranes Inc.

Industry Leader in RO Expertise and Membrane Applications Since 1983™

Applied Systems
Complete Reverse Osmosis RO Systems
Series AA
220 to 700 Gallons/Day (0.8 to 2.7m³/Day)

Designed to produce low dissolved solids water from tap or well water, these Reverse Osmosis RO systems use high efficiency reverse osmosis membranes. The product water is used in applications such as restaurants, aquariums, small manufacturing, and a wide variety of other applications.

Series AA RO systems offer a compact design. These economically priced systems are simple to install and operate. When combined with a water softener as pretreatment, they offer a reliable water purification solution.

Key Features:

- Over 20 years of experience is reflected in our quality
- Compact, Heavy Duty, Powder Coated Frame
- Proven components used throughout the system
- Conservatively engineered for reliable long term performance
- Factory tested to ensure trouble-free operation

STANDARD EQUIPMENT AA RO Systems

- Thin Film Composite Membranes
- Stainless Steel Pressure Vessels
- Rotary Vane Brass Pump
- Motor
- 5 Micron Pre-Filter (1)
- 10 Micron Carbon Filters (2)
- Polypropylene Filter Housings (3)
- Brass Auto Feed Shut-Off

- Heavy duty powder coated frame
- Liquid Filled System Pressure Gauges
- Low Pressure Switch
- Brass Pressure Regulator
- Polyethylene High Pressure Tubing
- Product Tank Pressure Control (turns system off with pressurized tank - tank sold separately)

OPTIONAL EQUIPMENT

- Stainless Steel Pump
- Stainless Steel Back Pressure Regulator
- Pressurized Product Water Storage Tank*

- Tank Level Control for Atmospheric Tank
- Softener*
- Backwashable Pretreatment* – Carbon or Media

About Pyrolox:
A mined ore, Pyrolox effectively reduces iron, sulfur and manganese from problem water.

A naturally mined ore, Pyrolox is a mineral form of manganese dioxide which has been used in water treatment for more than 75 years. Pyrolox is a granular filtration media for hydrogen sulfide, iron and manganese reduction. Pyrolox functions as a catalyst, but itself remains relatively unchanged. Pyrolox works on a principle whereby the hydrogen sulfide, iron and manganese are oxidized and trapped on the media while simple backwashing cleans the bed. No chemical regeneration is required, nothing is imparted into the drinking water and Pyrolox has a high capacity for low contaminant concentrations. Pyrolox can be used in conjunction with aeration, chlorination, ozone or other pretreatment methods for difficult applications. Chlorine or other oxidants accelerate the catalytic reaction.

Advantages of Pyrolox:
- Effective reduction of iron, sulfur and manganese
- Durable material with long service life and low annual attrition of bed
- No chemical regeneration required, only periodic backwashing

Conditions for Operation:
- pH: 6.5 - 9.0
- Because of its heavy weight, it is very important that Pyrolox filters are backwashed properly to insure adequate bed expansion and continued service life.

Iron Filters (Pyrolox)

Notes:
- Please add the appropriate voltage code to the end of the model no. when ordering.
- 110v/60Hz = 116, 220v/60Hz = 216, 220v/50Hz = 215. Example: W-MF1744P-116
- **5 gpm per sq. ft. of media is the best design condition for filtration. Backwash flow rate based on 25 psi pressure drop.
- ***Stainless Steel Jacket available for 9-16" Diameter as an additional option.

Specifications
- Vessel is rated at 150 psi maximum operating pressure, 120°F maximum operating temperature.
- All Systems Automatic
- Fleck Control Valve
- Standard Valve Configuration Below. Metered Valve, Electronic Valve, or change to 7/12-Day timer are available as options.
  - 7"-14" Diameter: 7-Day Timer.
  - 16"-48" Diameter: 12-Day Timer.

Also check our Filtration Media, listed on Page 7-11.
**About Carbon Filters:**
These filters are used to reduce chlorine, organics, color, tannin, and objectionable tastes and odors from water. Automatic backwashing system removes the trapped contaminants within the filter bed and washes them down the drain. Our Household Carbon Filters (10"-12" Diameter) use NSF approved coconut shell based carbon.

**Advantages of Carbon Filtration:**
- Significantly reduce the following contaminants:
  - Chlorine
  - Chlorine By-Products such as Trihalomethanes (THMs)
  - Bad Tastes and Odors
  - Turbidity
  - Herbicides, Pesticides & Insecticides
  - Volatile Organic Chemicals (VOCs)
