

III. STREET SHRUBS, GROUNDCOVER AND FLOWERS

A. Guidelines

1. Shrubs, groundcovers, flowers and other ornamental plantings may be used in place of trees where design opportunities permit or tree spacing is interrupted by utility placement.
2. Low plantings may also be used in conjunction with tree plantings to further buffer pedestrians along high-volume traffic ways, restrict mid-block crossing of pedestrians, or to change the spatial definition of the streetscape.
3. Shrubs, groundcovers and flowers may be used to define outdoor dining areas or pedestrian nodes.
4. Low-growing shrubs or groundcovers should be considered for use in the tree wells where tree grates are not used.

Street trees add to the pedestrian comfort level.
