Definitions:

Inquiries	An inquiry may be questions about an officer's actions, department policies, or matters of law. Often there are times when a citizen will bring forward a complaint and through a preliminary investigation which includes a thorough interview with the complainant, reading the officer's reports and/or reviewing the Axon camera video, we are able to determine immediately there was no misconduct on the part of the officer and in fact, what the officer did was correct.
Citizen and Internal Complaints	Complaints are external or internal allegations of wrongdoing made against a Department member.
Use of Force Incident	When force greater than "mere restraint" is used against another person, except in training or when a firearm is discharged, except in firearms training or competition.
Excessive Force Complaint	Any complaint that an officer used more force than necessary during any type of physical encounter with a citizen. Most Excessive Force Complaints are also counted as Use of Force Incidents but not all.
