

TABLE OF CONTENTS

1. EXECUTIVE SUMMARY 1

2. INTRODUCTION 3

3. WATERSHED ISSUES & BACKGROUND 5

4. COMPUTER MODELING 6

 4.1 DATA SOURCES & PROCESSING 6

 4.2 MODEL DEVELOPMENT & SELECTION OF PARAMETERS 6

 4.2.1 *Rainfall Hyetographs* 6

 4.2.2 *Subarea Delineation* 6

 4.2.3 *Subcatchment Imperviousness, Roughness & Depression Storage* 8

 4.2.4 *Subcatchment Basins* 8

 4.2.5 *Green-Ampt Soils Parameters* 9

 4.2.6 *Drainage Network Discretization (Links and Nodes)* 9

 4.2.7 *Open Channel Approximations* 10

 4.2.8 *Important Considerations and Implications Regarding Boundary Conditions and Return Periods* 10

5. MODELING SCENARIOS & COMPUTER FILES 11

 5.1 VERTICAL DATUM 12

 5.2 EXISTING (2004) CONDITIONS MODELS 12

 5.3 FUTURE CONDITIONS MODELS 13

6. MODELING RESULTS 14

 6.1 EXISTING (2004) CONDITIONS MAXIMUM WATER SURFACE ELEVATIONS 16

 6.2 FUTURE CONDITIONS MAXIMUM WATER SURFACE ELEVATIONS 20

7. MASTER DRAINAGE PLAN IMPROVEMENTS 25

 7.1. CAMELOT LAKE BYPASS 26

 7.2. PORTSMOUTH OUTFALL – GUST LANE TO DEEP CREEK BOULEVARD 27

 7.3. PORTSMOUTH OUTFALL – WEST OF U.S. 17 28

APPENDIX A. SUBCATCHMENT IMPERVIOUSNESS & SOILS PARAMETERS A-1
