

# Christmas Tree Safety

As you deck the halls this holiday season, be fire smart. A small fire that spreads to a Christmas tree can grow large very quickly.

## **PICKING THE TREE**

- Choose a tree with fresh, green needles that do not fall off when touched.

## **PLACING THE TREE**

- Before placing the tree in the stand, cut 2" from the base of the trunk.
- Make sure the tree is at least three feet away from any heat source, like fireplaces, radiators, candles, heat vents or lights.
- Make sure the tree is not blocking an exit.
- Add water to the tree stand. Be sure to add water daily.

## **LIGHTING THE TREE**

- Use lights that have the label of a recognized testing laboratory. Some lights are only for indoor or outdoor use.
- Replace any string of lights with worn or broken cords or loose bulb connections. Read manufacturer's instructions for number of light strands to connect.
- Never use lit candles to decorate the tree.
- Always turn off Christmas tree lights before leaving home or going to bed.

## **After Christmas**

Get rid the three after

Get rid of the tree after Christmas or when it is dry. Dried-out trees are a fire hazard and should not be left in the home or garage, or placed outside against the home. Chesapeake residents can dispose of their live Christmas tree by placing it at the curb (after removing all ornaments, lights and tinsel) on your scheduled garbage day. Be aware that your garbage day may change due to the holiday schedule. You do not need to schedule a bulk pickup to dispose of your tree. Bring outdoor electrical lights inside after the holidays to prevent hazards and make them last longer.
