

AVOID MOSQUITOES

PROTECT YOURSELF AND YOUR FAMILY

-  Wear long, loose and light-colored clothing.
-  If possible, stay indoors when mosquitoes are biting.
-  Use insect repellent products with the smallest percentage of DEET necessary for the amount of time you are exposed to mosquitoes, but no more than 50% for adults and 10% for children under 12. Adults should apply repellent on children.
-  Spray repellent on your hands and then apply to your face.
-  Only apply repellent to exposed skin and clothing. Do not use repellent under clothing.
-  Do not apply repellent over cuts, wounds, sunburn, or irritated skin.
-  Wash repellent off daily and reapply as needed.

PREVENT MOSQUITOES FROM BREEDING

-  Turn over or remove containers in your yard where water collects, such as old tires, potted plant trays, boats, buckets and toys.
-  Clean out birdbaths and wading pools once a week.
-  Clean roof gutters and downspout screens regularly.
-  Eliminate standing water on tarps and flat roofs.
-  Do not leave garbage can lids upside down or allow water to collect in your garbage can.
-  Make sure all window screens are in good repair without holes in them.

**Mosquitoes may carry potentially dangerous viruses,
such as West Nile virus.**
