The City of Chesapeake derives its governing authority from a Charter granted by the General Assembly of the Commonwealth of Virginia on January 1, 1963. The City is organized under a Council-Manager form of government in which the citizens elect the Council and the Council appoints the City Manager. Council also appoints the City Attorney, City Clerk, Real Estate Assessor, Planning Commission Members, Internal Auditor, and members of other boards and commissions. The Sheriff, Treasurer, Clerk of the Circuit Court, Commonwealth’s Attorney, School Board, and Commissioner of Revenue, are elected by the citizens. The City department heads are appointed by the City Manager.

Cities in Virginia are unique from those in most of the rest of the country. In Virginia, cities are independent of counties; therefore, they usually provide all local governmental services, including those typically provided by counties. As an independent city, Chesapeake is not located in a county. The City provides a full range of general governmental services for its citizens, including, police and fire protection, collection and disposal of refuse, water and sewer services, parks and recreation, libraries, and construction and maintenance of highways, streets, and infrastructure. Other services provided include social services, planning and zoning, mental health assistance, and general administrative services. Public education for students in grades kindergarten through twelve is provided by the separately-elected Chesapeake School Board. Since the School Board is fiscally dependent upon the City and the City Council must appropriate all school funds, the school operating budget is included in this document. Finally, certain services, including public health, agricultural services, and judicial services are shared with the Commonwealth of Virginia; only the City’s portion of those agencies are included in the operating budget.

The Citywide organizational chart on the following page lists each City department or agency and its relationship to the City Council, City Manager, and the Citizens.
HOW TO READ THE OPERATING BUDGET DOCUMENT

The Operating Budget Document is comprised of twelve sections. The first section is the Manager's Message. It highlights the significant changes from the current year, the City’s priorities and issues for funding in the coming fiscal year, the short-term financial goals and operational policies guiding the development of the budget, and the assumptions used in developing revenue estimates for the coming fiscal year.

The second section, the Overview, describes the City’s organization, the Operating Budget document, and the process for developing the Operating and Capital budgets. It also documents the City’s short and long-term financial and budget policies, summarizes the City’s debt management policies, highlights the City’s strategic goals and objectives, and explains the City’s financial structure.

The third section, the Summaries, provides an overview of all of the revenues and appropriations included in the Operating Budget. The fourth section, Revenue, describes each fund’s revenue resources, provides detailed information on the revenue estimates included in the Operating Budget, and provides a summary of the City’s economic outlook which guides the development of revenue estimates.

Specific information about each department is included in the next six sections:

**Governance and Management**
City Council and Office of the Mayor, City Manager, City Attorney, City Auditor, City Clerk, City Treasurer, Board of Elections/Registrar, Commissioner of Revenue, Real Estate Assessor, Budget, Customer Contact Center, Finance, Human Resources, Public Communications, Purchasing Department

**Quality Community of Life**
Integrated Behavioral Health (Community Services Board), Health, Community Programs, Interagency Consortium, Juvenile Services, Social Services, Public Libraries, Mosquito Control Commission, Parks, Recreation and Tourism

**Economic and Environmental Vitality**

**Education**
Chesapeake School Board

**Public Safety and Justice**
Fire, Police, Sheriff, Courts, Circuit Court Clerk, Commonwealth’s Attorney

**Other Costs**
Debt Services, Central Fleet/City Garage, Information Technology, Risk Management, Health Insurance Fund, Chesapeake Airport Authority Funding, and Non-Departmental Items

The Capital Budget Summary provides an overview of the City’s Capital Improvement Plan (CIP). A list of the CIP projects scheduled for the upcoming fiscal year, and an estimate of the Operating Budget impact of the projects upon completion. However, the CIP is a separate document. Greater detail about the CIP and specific projects is included in a separate capital budget document.

The final section is the Appendix. It includes statistics about the City, the City Charter, a chart of accounts, revenue details, and a glossary.
OPERATING BUDGET PROCESS

Operating Budget Development:

The City Charter requires the City Manager to submit a balanced operating budget to City Council by April 1\textsuperscript{st} for the ensuing fiscal year. The fiscal year begins on July 1\textsuperscript{st} and ends June 30\textsuperscript{th} of the following year. The approved budget, which may be modified by the City Council, is required to be adopted by a majority vote of the City Council by May 14\textsuperscript{th}, 47 days before the end of the current fiscal year. Otherwise, the budget as submitted by the City Manager becomes the budget for the ensuing fiscal year.

Operating Budget Development Process:

- **Multi-Year Forecast** - In the fall of each year, the Budget Office prepares a three-to-five-year forecast of revenues and identifies factors that will impact spending over the next several years. These include upcoming debt service payments and the operating cost of capital projects scheduled for completion. The multi-year forecast identifies factors that impact government spending, including, fuel costs and the costs for employee compensation and benefits. The first year of the forecast is used in creating a framework and target funding levels for departments in preparing the Operating Budget.

- **Department Operating Budget Submissions** - Each department or agency head submits an Operating Budget request identifying their resource requirements for the next three years. During the recent recession, departments were asked to submit a base level of funding at a targeted dollar amount. To better gauge resource requirements, this year department leaders were asked to identify all resource gaps within their department without restriction or targets. They were also required to plan their requirements over the next three years to ensure the sustainability of any new programs or initiatives. Budget requests are sent to the Budget Office for analysis and recommendations in early October.

- **Budget Review Committee** – The BRC includes the City Manager, the Deputy City Managers, the City Attorney, and several administrative officers who provide services to departments citywide. The BRC meets with each department head to review their operational requirements for the next three years. The committee reviews each proposal and recommends funding based on Council priorities, the affordability of the proposal, its sustainability, and its ability to successfully address citizen demands.

- **School Board** – The approved budget of the School Board is submitted to the City Manager for distribution to the City Council. The City Manager makes recommendations in his proposed budget regarding the total appropriation for the School System. City Council makes an annual lump sum appropriation to the School Board for its operating expenses.

- **Proposed Budget Presented to Council** – The City Manager proposes an Operating Budget to the City Council. The proposed Operating Budget includes tax rates sufficient to produce revenues needed to meet City and School expenditures contemplated in the combined initial budget. After City Council work sessions and public hearings, the proposed budget may be revised by the Council and an appropriations ordinance is adopted. Tax rates are established before the beginning of the fiscal year for which the budget is prepared.

Operating Budget Execution:

On July 1 of each year, the adopted budget is implemented. As the City’s finance staff completes the annual fiscal year closing (early August), the Budget Office reviews the number of revenues collected in the fiscal year ending in June. The actual level of revenues realized is then compared to the projections and assumptions used in preparing the Operating Budget for the budget year beginning in July. The Budget Office works with the City Manager to identify potential concerns and, if appropriate, advise the City Council of changes in revenue or spending projections. If necessary, the City Manager will recommend adjustments to the Operating and Capital Budgets to address problems that are identified. The Budget Office conducts a quarterly revenue analysis to determine whether collections are consistent with the Operating and Capital Budgets.
Operating Budget Amendments:

After Council adopts the original appropriation ordinance, the Operating Budget may be amended in two ways. First, the Council may adopt an ordinance to increase or decrease the total level of estimated revenue and appropriations based on actual revenue received. Second, the City Manager has limited authority to transfer resources within the operating budget. Larger transfers require approval by City Council.

Operating Budget Controls:

The Operating Budget Ordinance sets the legal level of appropriation controls at the fund level. The City Manager implements the following additional budgetary controls to ensure that expenditures are within appropriation approved by Council and the level of realized revenues.

- The City Manager requires that each department’s expenditure remain within the appropriations for that department by fund unless another specific level of control has been specified for a department.

- Budget transfers between funds, departments, or expense types require the approval of the City Manager and notification to the City Council. Budget transfers between the Operating and Capital budgets require approval by City Council.

- The City maintains an encumbrance accounting system. The estimated purchase order amount is encumbered before the release of purchase orders to vendors. Purchase orders that would result in an overrun of available funds are not released until additional appropriations are made available. Outstanding encumbrances are disclosed in the Notes to the City’s Financial Statements for each year-end.
Capital Budget Process:

- **Capital Improvement Budget** - The Capital Improvement Budget (CIB) is prepared before the Operating Budget but spans the same fiscal cycle - July 1st through June 30th. As with the Operating Budget, the process for the CIB preparation begins with the City’s multi-year forecast in the fall of each year. Through the forecast, the City estimates the resources available and the anticipated expenditures for the Operating Budget and the funding available for additional debt service to support new Capital Improvement Budget requirements. The Operating Budget document includes a Capital Budget Summary, which highlights specific debt management policies, the level of debt service, and the specific capital projects. However, the Capital Improvement Budget is prepared as a separate budget document, which provides greater detail on the CIB development and process.

- **Relationship to the Operating Budget** - Developing and adopting the Operating and CIB during the same general time frame, promotes sound fiscal policy and cohesiveness by allowing Council and management to review both requests simultaneously. Further, the Operating and the Capital Improvement Budget development are specifically integrated by:
  
  o Incorporating projected operating costs for each capital project in the City’s multi-year forecast.
  o Incorporating the anticipated level of debt service in the City’s multi-year forecast.
  o Appropriating the required level of debt service as part of the Operating Budget.
  o Appropriating the required operating costs associated with completed capital projects in the Operating Budget.
LONG RANGE PLANNING AND THE OPERATING BUDGET

Following is a brief description of planning processes within the City and the impact on the Operating Budget development process.

- Council Strategic Planning Meetings are held throughout the year to focus on the City’s goals, vision, and land use issues. The Council develops its vision and its list of priorities for the next three to five years. Additionally, staff provides the Council with a fiscal update, trends, and issues in various departments including Economic Development, Planning, Real Estate Assessor, and Public Schools.

- The Commonwealth of Virginia requires the City to adopt a Comprehensive Plan for the physical development of the territory within its jurisdiction. The Capital Improvement Plan (CIP) is a major tool for implementing the Comprehensive Plan. Projects included in the CIP shall be consistent with the City Comprehensive Plan. A second major tool for implementing the Comprehensive Plan is the Zoning Ordinance and its enforcement by the Department of Development and Permits.

- A five-year Capital Improvement Plan (CIP) is developed in advance of the Operating Budget. The development of the CIP and Operating Budget are coordinated by identifying projections for both in the multi-year forecast, by identifying the level of Operating Budget support required to finance the CIP, and by identifying the Operating Budget impact of completed CIP projects. The process and policies for the development of the CIP and detailed information about specific projects are included in a separate CIB document. A Capital Budget Summary is included in the Operating Budget.

- The Budget Office develops a multi-year projection each year. The projection includes the available resources and anticipated costs over five years. It incorporates levels of anticipated revenues, the projected levels of operating costs, the anticipated levels of debt service for the CIP, the anticipated impact of the Operating Budget for such increases in operating costs as new capital projects, budget drivers such as increased fuel costs, and increased employee compensation and benefit costs. In turn, the first year of the multi-year forecast is used as a framework from which to develop the guidelines and targets for the Operating Budget. This forecast is also used to determine the level of funding the City will have to support Capital Improvement projects.
DISCUSSION OF MAJOR FUNDS

General Fund
General fund revenue is expected to decline by $26.5 million to $577 million, or 4.4% below the FY 2020 budget level. This is a result of the severe decline in available resources caused by the COVID-19 pandemic.

Estimates of current real estate taxes have climbed by $5.4 million (2.0%) as the assessments for existing properties grew and new construction takes place. Growth in personal property taxes is slowing as residents replace fewer vehicles and prices in the used vehicle market stabilize. Accordingly, we anticipate minimal growth in current personal property taxes.

Transfers to Chesapeake Public Schools – Under revenue sharing procedures in place since 2004, most local tax revenues are shared with and allocated to Chesapeake Schools on a formulaic basis. Budget allocations are based on projected revenues but are “trued-up” after the end of each year based on actual revenue collections. For FY 2021, the revenue sharing formula provides $205.88 million for the School Operating Budget, a decrease of $6.18 million (2.9%) below the FY 2020 allocation.

We also recommend continued sharing of surplus funds in the Greenbrier TIF. Consequently, school transfers include $2.75 million of the Greenbrier TIF surplus. Below is a comparison of all operating transfers to schools for fiscal years 2020 and 2021.

<td>$213.59</td>
<td>$208.63</td>
<td>$-4.97</td>
<td>-2.3%</td>
</tr>
</tbody>
</table>

Transfers to Other Funds – General Fund resources support many other funds, including several Public Schools, Human Service funds, Chesapeake Integrated Behavioral Healthcare, and the Debt Service Fund. Operating transfers to special revenue and capital project funds declined by $22.7 million (4.8%). Significant changes from the previous year are noted below.

- Citywide practices for issues such as employee pay raises and healthcare typically affect General Fund transfers to other funds that are not self-supporting.
- Transfers to the Debt Service Fund will increase $1.34 million (3.9%) based on existing debt and planned borrowing. Most General Fund transfers to the Debt Fund are tied to the City and School lockboxes.
DISCUSSION OF MAJOR FUNDS (cont.)

- Changes in General Fund transfers to several special revenue funds are affected by the fund balance that was carried over from prior years and is available to finance current operations. Changes in transfers to Social Services, Interagency, Integrated Behavioral Healthcare, and Juvenile Services Funds were related to these applicable fund balances. The remainder of the change in transfers from the General Fund was related to routine changes in operating costs.

- General Fund transfers to Capital Funds are supported through the two capital lockboxes and from General Fund balances committed to future capital projects. Transfers reflect the most recent Capital Improvement Program.

Below is a summary of General Fund transfers for FY 2020 and FY 2021.

</tbody>
</table>

City Expenditures – General Fund expenditures will decrease by $13.50 million (4.2%) below the FY 2020 budget. For FY 2021, the budget includes $311.4 million of direct spending from the General Fund. Major changes in spending from FY 2020 are noted below.

Employee Compensation – In response to the COVID-19 pandemic, a proposed 2.25% general wage increase for employees was eliminated. Revenues will be monitored in the first part of the fiscal year for the availability of either a one-time or an across-the-board wage increase to be presented to Council.
DISCUSSION OF MAJOR FUNDS (cont.)

**Purchased Services** – Spending is increasing by $1.9 million; the primary factor is the recycling program and disposal of solid waste. Recycling costs are increasing by $1.7 million because of recent changes in the market. Other trash disposal costs have increased $450,000 based on increasing waste volume. The budget for jail medical costs has declined by $838,000 based on prior year experience and revised jail population estimates.

**Internal Service Charges** – the General Fund budget is increasing by $1.27 million (4.4%) based on increasing costs of internal services. The primary drivers are increasing costs of technology and maintenance of vehicles along with increased mowing services by jail work crews. Technology costs are increasing as we maintain legacy systems while also investing in security and new technologies.

**Other Costs** – The FY 2020 budget included a start-up payment of $1.0 million-plus an administrative support payment of $533,500 to the Chesapeake Land Bank Authority. The start-up payment is not part of the FY 2021 budget and the administrative support payment was reduced to $400,000 as we envision the Land Bank to become self-supporting.

**School Operating Fund**

In accordance with the Virginia Constitution, school funding is a shared responsibility of the Commonwealth and its localities. Unlike many school divisions throughout the United States, Virginia school districts do not have taxing authority, and are, therefore, fiscally dependent upon the locality in which they are located. For this reason, the School’s operating budget is part of the City budget. The $571 million operating budget for Chesapeake Public Schools (CPS) is summarized below.

The school spending plan for FY 2021 is $38.6 million (7.25%) above the FY 2020 budget to address the four Strategic Goals from the School Board

- Goal 1: Providing exemplary teaching and learning opportunities:
- Goal 2: Recruit, Retain, and support valued employees:
- Goal 3: Provide a safe and supportive learning environment:
- Goal 4: Engage, inform, and collaborate with the community to support the school mission:

The budget proposed by the Superintendent was based on budget proposals made by the Governor to the State General Assembly. The General Assembly’s budget bill is expected to increase school funding above the level recommended by Governor Northam. We anticipate that the school division will submit revisions later in the spring.
DISCUSSION OF MAJOR FUNDS (cont.)

While School funding has improved significantly, the division continues to rely on funds accumulated in previous years to meet current operating costs. Next year, the division plans to use $25.6 million in accumulated funds in the Textbook and Self-Insurance funds.

City Funding of Schools - For many years, Chesapeake has shared growth in general tax revenue equally with the School Board. The School’s share of local revenue and its annual operating budget are both based on local revenue projections. However, the ultimate allocation of local tax revenue is based on actual revenue recognized. City staff monitors local revenue throughout the year so that CPS may adequately plan for spending adjustments in the event actual revenue falls short of the projection.

While State statutes require school districts to return unspent funds at year-end, the city has a long-standing practice of allowing the School Board to direct the use of such funds. Further, if local revenue collections exceed those projected in the revenue sharing formula, such excess revenue is shared with CPS. As of June 2019, the city was holding approximately $9.9 million of school surplus funds, $1.3 million of which was used to fund the FY 2020 School operating budget. While the remaining funds have not been scheduled, best practices support the usage of surpluses for non-recurring purposes.

Debt Service Fund

The budget for debt service payments is approximately $658,000 greater than in FY 2020 and includes anticipated borrowings through December 2020. Listed below are the debt funding sources for fiscal years 2020 and 2021:

<table>

</tbody>
</table>

Since 2004, the City has designated certain revenue for capital lockboxes that support the financing of School and City capital projects. Debt service on all debt issued after 2003 is paid from the designated revenues. During FY 2021, pre-lockbox debt payments decline by $1.35 million while debt payments funded with locked revenues increase by $1.85 million.

On June 30, 2019, the Debt Service Fund (DSF) balance was $13.5 million which the City plans to use for future debt payments. For the next several years, the city will use between $2.1 million and $2.85 million from the available DSF fund balance to pay the pre-lockbox debt. The City will continue utilizing the DSF fund balance until the pre-lockbox debt is entirely retired (FY 2024), at which point, the DSF fund balance will be significantly smaller.
DISCUSSION OF MAJOR FUNDS (cont.)

**Virginia Public Assistance Fund** (Social Services)

The Social Services Division of Human Services is the local agency that administers federal and state public assistance programs. Social Services’ primary function is to determine the eligibility of residents for a variety of federal and state social benefit programs. Due to the COVID-19 pandemic, the Social Services budget is decreasing from $23.4 million in FY 2020 to $22.0 million in FY 2021, a decline of $1.41 million (-6.0%). No significant changes in service levels are planned for Social Services during FY 2021. The funding level is adequate to meet state and federal mandates for the programs it administers.

**Chesapeake Integrated Behavioral Healthcare**

Chesapeake Integrated Behavioral Healthcare (CIBH) was established as a community services board to provide mental health, development, and substance abuse services in accordance with the Virginia statute. These services are provided through CIBH, the agency that reports to a local board appointed by City Council. As a result of the COVID-19 pandemic, the FY 2021 operating budget for CIBH will decrease by $308,000 (6.0%) to $29.0 million.

**Tax Increment Funds (TIF)**

The statutes governing TIFs allow for the transfer of surplus TIF funds to the General Fund. Consistent with past practice, this budget includes provisions to transfer surplus funds from both the South Norfolk and Greenbrier TIF Funds to the General Fund to address the maintenance cost of projects funded by the TIFs and other costs that are directly related to the TIF districts. We recommend the transfer of $333,700 of surplus funds from the Greenbrier TIF to the General Fund to pay for maintenance of improvements to the district and to fund the Police Department Hotel Interdiction Program. We also recommend the transfer of $165,700 from the South Norfolk TIF to fund the maintenance of improvements to that district, a police bicycle patrol, and the cost of the Sheriff’s work crew assigned to South Norfolk.

In addition to transfers of TIF resources for the maintenance of TIF improvements and related costs, we also transfer $1 million annually from the South Norfolk TIF to the General Fund to pay a portion of the debt service costs related to the renovation of Oscar Smith Middle School. Ten annual transfers were planned for the OSMS renovation. These transfers are scheduled to end in FY 2021.

Cash funding of capital projects in the CIP will require a transfer of $11.4 million from the South Norfolk TIF, primarily for the South Norfolk Municipal Building project, Freeman Avenue railroad overpass, and Chesapeake Avenue drainage improvements.

Starting in FY 2016, the City began an annual declaration of surpluses in the Greenbrier TIF to support operations of the City and Schools. In FY 2016, $2.0 million was transferred, but the annual transfers increased to $2.5 million in FY 2020. The additional funds help Chesapeake Public Schools address the recruitment and retention of teachers, as well as the increasing cost of employee health insurance. The City’s share of surplus TIF funds helps address existing commitments to residents and employees. To address slow revenue growth, we recommend increasing the annual surplus declaration to $5.5 million. That provides additional resources for City operations and School capital needs.

The City awarded Dollar Tree an Economic Development Incentive Grant for its development of a large parcel in Greenbrier. Because of the size of the project and the EDI grant, the usual funding source for EDI grants is not adequate. Starting in FY 2020 the City declared a surplus and began drawing $750,000 annually from the Greenbrier TIF to fund the Dollar Tree grant. The planned transfers are for six years ending in FY 2025.
**Public Utility Fund**

In June 2017, the City Council approved a new 30-year contract with the City of Portsmouth, a major supplier of water to the city. Under the plan, both water costs and the minimum amount of water purchased were lowered. The new contract reduces costs by $2.0 million annually and ensures a long-term water source. With the lower water costs, City Council also approved a plan to freeze water and sewer rates for two years followed by 2.0% annual increases starting in FY 2020. The department estimates spending $530,000 less in FY 2021 due to the City’s renegotiated contract for water purchases.

The department’s budget also reflects the integration into its operations of water and sewer services to communities along Indian River Road (northeast section of the city), which added several hundred new customers along with the associated revenue and expenditure beginning in FY 2019.

The overall operating budget of the department decreased by $1.71 million (-2.5%) for FY 2021. This is largely due to the department aligning its budget to better account for large expenditures that were reoccurring every year, in addition to anticipated revenue constraints made due to the COVID-19 pandemic.

The approved budget allows the department to continue to improve responsiveness to citizen requests, maintenance and dependability of the water and sewer systems, and department productivity.

**Stormwater Management Fund**

The Stormwater Management Operating Budget will increase by $2.5 million to $15.2 million in FY 2021. Significant changes to the Stormwater budget include increases in purchased services, capital outlays, system maintenance contracts, and administrative and internal service charges. We also plan to reduce transfers to the Capital Improvement Fund to $3.7 million in FY 2021.

**Chesapeake Transportation System Fund** (toll roads):

The Chesapeake Transportation System (CTS) includes the tolled section of Route 168 and a section of Dominion Boulevard (Route 17). Annual revenue is projected to increase by $1.47 million (4.9%) based on increased tolls. The annual budget declines from $34.6 million in FY 2020 to $29.5 million to (14.6%) in FY 2021. The decline is largely related to a one-time payment of construction period interest in July 2019. For FY 2021, debt payments include current interest payments plus principal payments based on toll collections. Debt costs will decrease from $21.9 million in FY 2020 to $16.5 million in FY 2021.

Summary of significant budget increases for Chesapeake Transportation System:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debt service costs (described above)</td>
<td>$5,358,700</td>
</tr>
<tr>
<td>Purchased services – primarily related to the collection of tolls</td>
<td>(685,400)</td>
</tr>
<tr>
<td>Repairs and maintenance</td>
<td>501,300</td>
</tr>
</tbody>
</table>

**Central Fleet Fund (also includes Sheriff Mowing)**

The Central Fleet Fund operates as an internal service fund to provide vehicle maintenance services to other City departments. Funding is derived from charges to other City departments and the sale of fuel to Chesapeake Public Schools. In addition to fleet and garage services, the fund is also used to account for the activity of the Sheriff’s work crews that primarily provide services to Public Works and Parks. As a result of the COVID-19 pandemic, the approved annual budget decreases from $20.6 million in FY 2020 to $17.7 million in FY 2021 (-14.1%).
Information Technology Fund

Information Technology operates as an internal service fund to provide technology, communications, and related services to other City departments and Chesapeake Public Schools. Funding is derived from payments received from the other departments and Schools. The approved annual budget increases from $14.2 million to $14.6 million (2.9%). A significant part of the increased budget reflects continued costs of operating mainframe applications that were previously scheduled for conversion to server-based platforms. Major changes to the budget are as follows:

- Retirement costs – increase in rates: 52,700
- Wage and benefit savings – employee retirements and turnover: (230,100)
- Supplies and small equipment: 150,200
- Other purchased services: 407,250

Employee Health Insurance Fund

The Employee Health Insurance Fund was established to pay employee healthcare claims as processed by a third-party administrator (TPA). Under a self-insured arrangement, the City collects premiums through employee withholding and payments from former employees participating in the City plan. These premium payments along with the employer’s portion of the program costs are deposited in the health insurance fund. As healthcare providers submit claims to the TPA, the city reimburses such costs from the money it collects.

Healthcare premiums are determined each year based on the City’s claims history with an allowance for increasing utilization and medical inflation. City staff works closely with the TPA and the City’s insurance consultant to set premiums sufficient to pay projected claims that are incurred each year. Premiums increased 10.0% for the plan year starting January 1, 2020. We are projecting healthcare costs to rise 10% annually based on increasing utilization and medical inflation. We have also revised costs down slightly based on changes in the membership and enrollment selections.

The budget for the Health Insurance Fund rises from $45.70 million in FY 2020 to $49.87 million in FY 2021 (up 9.1%).

Risk Management Fund

The Risk Management Fund operates as an internal service fund providing insurance and worker compensation services to other City departments. The budget is decreasing from $10.9 million in FY 2020 to $10.5 million in FY 2021 (-3.7%). The budget reduction is based on a prior year’s claims which support a reduction in future estimated claims. We have assumed that future claims will rise 5% annually.
DISCUSSION OF MAJOR FUNDS (cont.)

Other City Operating Funds

The approved operating budget also includes several funds whose spending levels are not changing significantly from FY 2020. Separate funds are maintained for the following purposes:

- **Interagency Consortium** – a division of Human Services, the Consortium places students with disabilities with providers who address instructional and behavioral requirements in accordance with the Children’s Service Act.

  *Approved annual budget - $5.4 million.*

- **Juvenile Services Fund** – provides safe and secure detention services for juvenile offenders from Chesapeake and several surrounding localities.

  *Approved annual budget - $6.0 million.*

- **Fee-Supported Programs** – this fund is used to account for the activity of several services that are supported entirely by fees. Three services are currently included in the fund:
  - Fire Department’s Hazardous Environmental Action Team (HEAT) focuses on the reduction and elimination of dangers caused by hazardous materials and conditions. Funding of the program is provided by inspection fees and fines issued for violations.
  - Police Department’s Red Light Photo-Enforcement project monitors intersections with higher than average accident rates. The program is funded by fees collected from offenders identified by the contractor maintained cameras. Program revenue and costs have increased since cameras were added to several intersections in the calendar year 2019.
  - Development & Permit’s Code Compliance/Demolition Program seeks to remove nuisance buildings and conditions that exist in residential and commercial areas. Funding is derived from property owners via liens attached to offending properties.

  *Approved annual budget - $1.4 million.*

- **Conference Center and Tourism** – operates the Chesapeake Conference Center and the City’s Tourism Bureau, both of which are funded from dedicated meals and lodging taxes.

  *Approved annual budget - $4.2 million.*

- **E-911 Fund – Emergency Dispatch** – operates as a division of the Police Department (with support from Information Technology) to answer emergency (911) calls and to dispatch appropriate fire, emergency medical, and/or police personnel to assist citizens. The division is supported by communications sales taxes and payments from the Virginia Wireless Board. Increases in the FY 2021 budget address the rising costs of equipment maintenance and communications.

  *Approved annual budget - $8.4 million.*

- **Mosquito Control Commission** – operates as an autonomous unit governed by a commission appointed by City Council. Its purpose is to control mosquito populations and prevent mosquito-borne illnesses.

  *Approved annual budget - $4.9 million.*
 Following is a list of short term Operating Budget and financial policies used in developing and allocating funding in the Operating Budget. The list is evaluated each year.

**Operating Budget Policies:**

- Adhere to the City’s Charter for preparing, presenting, and deciding on budgets.
- Adhere to the State Code requirement (§22.1-93) that the governing body of a municipality shall approve an annual budget for educational purposes by May fifteenth or within thirty days of the receipt by the municipality of the estimates of state funds.
- Develop the Operating and Capital Improvement Budgets under the supervision of the City Manager.
- Coordinate the development of the Operating and Capital Budgets in order to link the two together before making decisions on either.
- Implement approved/amended budgets and policy direction by Council under the supervision of the City Manager with input from the departments.
- Reevaluate “Base Budget” to ensure removal or reduction of any nonrecurring requirement or service in the latest Approved Operating Budget.
- Assure quality of programs in preference to poor or marginal quality programs even if it is necessary to eliminate services to balance the budget.
- Assure “Excellence in Stewardship” with a balance between resources allocated to good management and legal compliance versus resources allocated to service for our citizens.
- Ensure that the personnel complement in the Operating Budget accurately reflects the City’s latest Human Resources Management System and Compensation Plan.
- Evaluate the benefits of computers, special equipment, vehicles, and other required equipment before purchase and/or replacement according to useful life criteria when not determined “economically non-repairable.”
- Recover full costs of common services provided by Central Fleet (Garage), Department of Information Technology, and Self-Insurance by charging the using departments and reimbursing for the services through Internal Service Funds.
- Evaluate the City’s allocation of resources to civic and external organizations based on need and relative benefits to its citizens and/or humanity. Require contracts and periodic reports of actual citizens and persons served.
- Provide for increased operating costs in the Operating Budget of newly completed or acquired facilities that were initially funded through the Approved Capital Budget.
- Adhere to the City’s Charter for Public Hearing before approving/amending budget and/or appropriating funds.
- Require prior approval of all affected departments before transferring charges between departments.
- Execute budget(s) as approved and manage, advise, and seek corrective consent when the latest Council intent is not being met.
- Fund, to the extent possible, the capital costs for technology.
• Evaluate new technology spending for future cost savings and adjust appropriations accordingly.
• Support economic development programs that will add to the City’s tax base.
• Support public safety programs that will have a direct impact on the safety and wellbeing of citizens.
• Support programs and services for education, recreation, development of youth, and senior citizens.
• Look for alternative sources for providing services and programs within the community at no cost or at a lower cost than currently being provided by the City.
• Seek privatization opportunities where programs and services can be offered at a lower cost than what the City is spending provided that the quality of services is not compromised.
• Support regional cooperation to the extent that all involved parties receive a proportionate benefit and the City of Chesapeake’s costs are minimized.
• Actively seek public/private partnerships for services currently funded by the City of Chesapeake to reduce the City’s costs and/or expand program scope to reach more citizens.
• Appropriate all grants, as defined by the City’s Grants Special Revenue Fund Policy, to the Special Revenue Fund.
• Appropriate funds equal to estimated revenues from a dedicated funding source.

Financial Policies:
• Expect Operating Budget to be balanced on current revenue and current expense basis.
• Maintain a reserve equal to six percent (6%) of General Fund revenue as “Cash Flow and Emergency Reserve” as required by the charter.
• Maintain a reserve equal to an unassigned fund balance of at least ten percent (10%).
• Use lease/purchase financing cautiously and for periods that do not exceed the estimated useful life of the item of equipment and/or facility being financed. Generally, financing of capital projects should not exceed twenty (20) years, except in the case of transportation infrastructure.
• Expect the City Treasurer to pool all unrestricted monies and invest in a manner to maximize revenue in low to no risk offerings while measuring cash availability for payrolls and bills.
• Do not rely upon debt for current operations.
• Continue to solicit and accept external grants only for non-permanent purposes so that the City dollars are not required to fully fund the program at end of the grant period.
• Continue to evaluate the necessity and value of the required fund balance and reserves and communicate the criteria and methodology used.
• Use one-time revenues/resources to support projects, programs, and purchases with one-time costs.
• As the governing body, only the City Council has the authority to commit the City’s fund balance for a specific purpose. The City Manager has the authority to assign fund balance for a specific purpose. The commitment and assignment of the fund balance is made before the end of the fiscal year. City Council authorizes the use of fund balance through formal City Council action. The fund balance is spent first from the highest level of constraint or restriction to the lowest level of constraint.
POLICIES GUIDING DEVELOPMENT OF THE CAPITAL IMPROVEMENT PLAN

Following is a list of policies used in evaluating projects for the Capital Improvement Plan (CIP). The CIP is a separate document, but the Operating Budget document includes a summary of the CIP under a separate section at the end of this document.

- Prepare the Capital Budget for construction and repair of buildings, roads, and schools with project cost over $100,000 in any fiscal year.

- Review each project included in years two through five of the Approved CIP for revised cost estimates.

- Review the inventory of unfunded capital projects and revise the inventory to reflect the elimination or addition of projects.

- Rate projects to be considered for funding using the following criteria:
  1. Replacement of existing infrastructure.
  2. Reduce the cost of operations.
  3. Support economic development efforts.
  4. Improve safety and reduce risk exposure.
  5. Comply with the City’s current Comprehensive Plan.
  6. Generate additional net revenue to the City of Chesapeake.
  7. Outside revenue sources are available to leverage City funds.
POLICIES GUIDING DEBT MANAGEMENT

The following list is a summary of the major debt management policies used in developing the CIB. A full list of the City’s debt management policies is included under the Capital Budget Summary, a separate section, at the end of this document.

- Limit the City’s debt to 10% of the assessed value of real estate subject to local taxation according to the mandates of the State of Virginia.
- Further limit the City’s debt for bonds and notes other than refunding to amounts authorizing by a majority of qualified voters voting in an election on the question according to the Charter.
- Authorize bonds or notes without an election in any calendar year in an amount not to exceed $4,500,000 plus the amount of debt retired in the previous fiscal year.
- Restrict the City-wide borrowing authority to a maximum of 3½ % of the assessed value of real estate as shown by the last preceding assessment for taxes. (Contracts other than bonds and notes are excluded.)
- Restrict overall per capita debt to $3,000.
- Payback its debt, exclusive of enterprise debt, for specific items within the period of the estimated useful life or twenty (20) years, whichever is less, except in the case of transportation infrastructure.
- Maintain good communication with bond rating agencies about the City’s financial condition with full disclosure and integrity on all financial data and debt offering.
- Own water and sewer facilities and finance new construction with a general obligation or revenue bonds that are solely supported by enterprise revenues.
LONG TERM FINANCIAL AND PROGRAMMATIC POLICIES

Strategic Goals and Objectives:

• Continue to administer development activities in accordance with the Comprehensive Plan.
• Continue diversification and expansion of Chesapeake’s economic base through selective and aggressive recruitment, and retention of existing businesses.
• Provide City water customers with adequate volume and quality of water.
• Continue development of the stormwater management system and continue qualitative drainage measures.
• Continue implementation of the Fair Share agreement with the NAACP.
• Maintain competitive pay and benefits for City employees. Continue efforts toward a representative workforce.
• Provide support in public safety to maintain current response time and professionalism, to limit injury, loss of life, and property.
• Continue innovative programming of services to youth in the community through Interagency Consortium and the City’s youth-serving organizations which include Court Services Unit, Bureau of Community Programs, and Chesapeake Juvenile Services.
• Provide a wide range of leisure activities and facilities with a focus on low-income neighborhoods.

Financial Goals and Objectives:

• Maintain and continuously refine the Multi-Year Forecast which is a model for revenues and expenses for the General Fund.
• Continue to provide resources that exceed minimum State requirements to Chesapeake Public Schools.
FINANCIAL STRUCTURE

Description of the Accounting Structure:
The accounting system used by the City of Chesapeake is organized based on funds or account groups. A fund is defined as a separate, self-balancing set of accounts that are segregated to measure specific activities or attain certain objectives. Each fund is comprised of assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate. The following fund types and account groups are used by the City: Governmental Funds (such as the General Fund and Special Revenue Funds), Proprietary Funds (such as the Enterprise Funds and Internal Services Funds), and Fiduciary Funds. The appropriations within each fund are further classified into departments, programs, or functions. Expenditures within each department are posted to accounts that describe the items purchased.

Basis of Accounting:
The City’s Comprehensive Annual Financial Report (CAFR) presents the financial position and results of operations for the City operations of various funds, account groups, and component units. It is prepared using “generally accepted accounting principles” (GAAP).

- Under GAAP, the modified accrual basis of accounting is used for governmental (such as the General Fund and special revenue funds) and agency funds. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual, i.e. both measurable and available. Expenditures are recorded when the related fund liability is incurred.
- Under GAAP, the accrual basis of accounting is used for proprietary fund types (enterprise funds) and nonexpendable trust funds. Under the accrual basis of accounting, revenues are recognized when earned, and their expenses are recognized when they are incurred.
- Under GAAP, a government-wide financial statement is prepared using the accrual basis of accounting. In the government-wide financial statement, certain governmental funds are grouped for reporting purposes.

Basis of Budgeting:
The City’s budget preparation conforms to GAAP by using a modified accrual basis for preparing the operating budgets for the general, governmental, and agency funds and the full accrual basis for enterprise funds. However, the basis of budgeting differs from the basis of accounting in the following areas:

- The City’s CAFR includes the Chesapeake Economic Development Authority, the Chesapeake Port Authority, and the Chesapeake Airport Authority as component entities. The Operating and Capital Improvement Budgets do not include estimated revenues and appropriations for the operation of the three authorities. The portion of the revenues derived from City General Fund support of these agencies is reflected in the Operating Budget.
- The estimated revenues and appropriations in the Community Renewal Fund are not included in the estimated revenue and appropriations for the Operating Budget or in the Capital Improvement Budget. The Community Renewal Fund includes revenue from the Community Development Block Grant (CDBG) and the HOME grant. The CDBG and HOME grant are appropriated by Council outside the annual Operating and Capital Improvement Budget cycles.
- The Capital Projects Funds, Utility Construction Funds, and the Community Renewal Fund budgets are adopted on a five-year project basis instead of a fiscal year basis. The first year of the plan is appropriated as the Capital Budget for each fiscal year.
FINANCIAL STRUCTURE (cont.)

- The purchase of capital outlay is included in the budget in the year of the initial purchase at full cost; capital outlays are not budgeted as a depreciation expense.

- Budgetary accounting recognizes purchase orders as charges to the operating budget during the year in which they are issued. This is different from a financial account that recognizes such commitments as expenditures only as orders are filled by the vendor.

- Debt service is budgeted for principal and interest payments that are due and payable during the fiscal year. The budget does not include accruals of interest that are not due on June 30th of each year.
