**Notes:**

MDL Denotes the analyte is at or below the Method Detection Limit.

All data is presented in micrograms per Liter (ug/L) or parts per billion (ppb).

SW-10 is an offsite upgradient surface water body located west of the railroad tracks along the eastbound lane of Etheridge Manor Boulevard.

J The reported value is between the Laboratory Method Detection Limit (MDL) and the laboratory Method Reporting Limit (MRL), adjusted for actual sample preparation data and moisture content, where applicable.

Metals analyzed by EPA Methods 6000 and 7000 Series.
