

# Inspections List

INSPECTION TYPE	PERMIT TYPE	PREPARATION/WHEN TO SCHEDULE
Footing	Building	Before pouring concrete. The trench must be prepared and inspected prior to the placement of concrete. Property must be flagged in such a manner that the inspector can verify the general setback requirements. Dig your footing trench, install grade stakes to show the depth of concrete to be poured. Some footings may require additional reinforcement which must be in place at the time of inspection. After approval of footing inspection you may proceed with the placement of concrete and the framing of your structure.
Foundation	Building	Before pouring concrete to verify the footing and insulation of slab.
Slab (if applicable)	Building	After approval of all sub-trade ground work and after installation of reinforcement, vapor barrier and perimeter insulation (if required) and prior to placement of concrete.
Trench	Electrical	This inspection is before filling the trench for underground service lines.
Plumbing Slab	Plumbing	This inspection is for water and sewer lines that are installed prior to pouring a concrete slab. Sewer line must be filled with water for a test prior to inspection.
Water/Sewer	Plumbing	This inspection is prior to covering water, sewer or both lines that extend from the house, to the utility lines.
Rough-in	Plumbing/Electrical	Before covering the wall. Inspections of water/sewer and some fixtures for plumbing and of the electrical components including all wiring and receptacle and switch boxes are installed for electrical.
	Mechanical	Inspection of the mechanical components including ductwork, sealing and insulation before concealment. This may also include a manufactured fireplace rough-in inspection where the flue pipe and clearances to combustibles are inspected.
Pressure Test	Gas	Inspection prior to concealment of the gas line components must be under pressure.
Framing	Building	Inspection of the structural parts of the enclosure including sill plates, anchorage, wood studs, floor and ceiling joist, sheathing, and rafters if applicable. All draft-stopping and fire-blocking must be installed. <b>The framing inspection must be performed after the trades rough- In inspections have been approved.</b>
Insulation	Building	At the completion of the required insulation installation, excluding accessible attic and crawl spaces before concealment and after the framing inspection.
Service	Electrical	If applicable an Inspection of the electrical service before concealment.
Final	Electrical, Mechanical, Gas, Plumbing	After work is complete.
Final	Building	At the completion of the project after all of the trades have received final approval.
Grading	Building	Finished Grade is established, to include the slope of the 10' perimeter of the house and driveway slope as well as seeding/site stabilization for compliance with Stormwater regulations.
Landscape	Building	Required number of trees are planted with 1 being in the front yard.
