

City of Chesapeake

Generic Site Plan

Permit address: \_\_\_\_\_

Please choose the lot configuration below that best represents the property. Mark an "X" to indicate the location of the outside equipment. If the property is in the "AE" Flood Zone the required installation elevation will be indicated on the back of this form.

\*\*\*\*\*By submittal of this document with your permit you acknowledge that it is your responsibility as the permit holder to comply with all provisions contained in the Chesapeake Zoning Ordinance and to abide by the property rights of others, including those of the City of Chesapeake and any lawful easement holders. It is further acknowledged that any inspection conducted by the City of Chesapeake in accordance with the issuance of this permit are not conducted to ensure that the structures erected are within the applicable setbacks, outside easements or in compliance with private deed restrictions. The City will not assume liability for any error made in the location of any structure upon the property in question, such liability falling solely upon the owner, builder or other responsible party.

If this box is checked, the property you are obtaining a permit for falls within the "AE" flood zone. In order to complete the permit process, you must complete and sign this form.

By signing this document you are indicating that you understand and will adhere to this requirement for your installation or construction. You further understand that any elevations indicated here are only to assist you and not guaranteed to represent the actual elevations. Guaranteed elevations can be obtained from your surveyor.

City of Chesapeake

Generic Site plan

All permits for construction, installation of outside equipment or other installations below the required elevation height for areas in the "AE" Flood Zone must be installed above Regulatory Flood Protection Elevation (RFPE). In order to determine your installation height, you will need a survey of the property or you may visit the City of Chesapeake website at <http://gisweb.cityofchesapeake.net/website/quicksearch/index.html#> to search the property address and use the topography layer which will show the current elevation. Use the formula below to show the actual height from the current grade that the equipment will be installed. The equipment must be installed at the required elevation and must be anchored as well as any equipment stand that may be used.

Current elevation from Chesapeake topography map or survey

(round to nearest#) = \_\_\_\_\_ (ex: 6.96=7.00) \*\*\*To be completed by City staff;

Minus(-)

Required elevation for outside equipment 9.5 or 6.0 = \_\_\_\_\_ (ex:9.5)

Installation should be at this height from the grade = \_\_\_\_\_ (ex:2.5)

NOTE:

The elevations indicated here are to assist you and in no way are guaranteed to represent the actual elevations of the site. Exact elevations can be obtained from your surveyor.
